

HR in the **SEC³URE Ethos**

Onboard clinical contractors in
minutes, not months

It's time to let credentialing work hard for you, not vice versa.

Clinical contractors are a great solution to the last-minute staffing shortages that happen every day. Managing the massive amount of onboarding details can be overwhelming and makes it hard to be nimble in a pinch.

We created the **SEC³URE Ethos** so you can be ready for these challenges! No more chasing down documentation from agencies and physician practices to fill gaps or play catch-up.

Life in the **SEC³URE Ethos** means you can staff instantly while having total control.

Here's how it works:

- + You give us your policies and we'll set your protections.
- + We confirm everyone is trusted and verified.
- + Our customer support Heroes do all the work for you.

Here's what life in the Ethos looks like for you:

- + You staff instantly because you've got access to an unlimited supply of trusted clinical contractors.
- + You will never chase down paperwork again, our customer support Heroes do that for you.
- + You can trust us to monitor expirables, sanctions and support you in an audit.

Agencies win too! Every clinician gets a digital credential file which works at any SEC³URE facility, cutting agency credentialing costs by over 90% and allowing placement in minutes!

With IntelliCentrics, you have **complete control** over the credentialing process while our customer support Heroes do all the work for you.

With IntelliCentrics, everyone wins.
