

Supply Chain in the **SEC³URE Ethos**

Vendor representatives trusted,
every visit, every day.

It's time to get total control of your vendor representatives.

Vendor representatives are essential to hospital efficiency but maintaining control and ensuring their compliance can be exhausting.

We created the **SEC³URE Ethos** to make vendor management easy, with no hardware to support. All vendor reps registered in the **SEC³URE Ethos** are trusted to be onsite, so your reimbursements are safeguarded and you maintain total control of those involved in patient care.

Life in the **SEC³URE Ethos** means compliance is technology driven and costs are lower because facilities and reps have the tools they need to do their jobs more efficiently.

Here's how it works:

- + You give us your policies and credentialing requirements.
- + We confirm everyone is trusted and verified.
- + Our customer support Heroes do all the work, while you keep total control.

Here's what life in the Ethos looks like for you:

- + You get 100% vendor rep compliance because our Heroes monitor everyone daily.
- + You don't have to deal with kiosk maintenance so your costs are lower.
- + Your reimbursements are safeguarded because everyone is trusted.

In the **SEC³URE Ethos**, you can trust that:

- You will know who's onsite and that their compliance is assured.
- There is no hardware to support.
- There will be no surprises because our Hero team has your back.

With IntelliCentrics, everyone wins.
